

Vet Bill Appeal – Oldies Club is in desperate need of financial help to enable it to continue helping older dogs, many of which require veterinary treatment while in foster care, before they can be rehomed.

Below are some of the dogs who have been taken in by Oldies Club, along with details of the costs involved in caring for them.

The beautiful FeeBee is an Oldies Club sponsor dog who remains in foster care due to her ill health.

Oldies Club has so far paid over **£1,220** to care for FeeBee.

Please make a donation towards our ongoing veterinary care costs, if you can. Thank you.

Poor Cofi had a bacteria/yeast type skin infection and needed to be bathed twice weekly with Maluseb shampoo and was also on antibiotics. She is also on medication for a thyroid problem which left her very overweight.

Oldies Club spent over **£521** caring for Cofi prior to her adoption.

Ernie, an elderly Beagle, had to have a toe removed (due to a tumour), while in Oldies Club care and also had a dental and five cracked teeth removed.

He also had a skin condition when he arrived in foster and was on antibiotics and will need regular baths in the future.

Oldies Club paid over **£624** to care for Ernie before he was rehomed.

Jack, an elderly Patterdale, came into Oldies Club care when his owner sadly passed away.

He is neutered, microchipped, vaccinated, flea and worm treated and also required a dental and, due to his arthritis, will have to remain on Metacam for the rest of his life.

Oldies Club has paid over **£632** to care for Jack since he arrived in foster care. **Jack is still looking for a new home.**
